

Delight your patients with a complete experience.

Increase Patient Satisfaction

Don't let hyperplastic gingiva or asymmetric tooth display spoil the excitement of debanding day. The most satisfying part of owning an EPIC X soft-tissue laser is putting a smile on your patient's face with aesthetic gingival recontouring.

As you improve the patient's soft-tissue symmetry and increase tooth display, patient satisfaction will increase. So will referrals, as happy patients tell others about their experience.

Enhance Your Services

Treat mouth sores triggered by braces quickly and efficiently for increased patient comfort. Offer laser whitening as part of the smile transformation in your office.

Gingivoplasty around teeth needing bonding or prosthetic build-up will enhance the value of your services to referring dentists.

"From the simplest to most advanced procedures, my BIOLASE diode handles all soft-tissue needs for my Orthodontic practice."
— Dr. Bob Waugh, Athens, Georgia

Increase your productivity.

Increase Efficiency

BIOLASE soft-tissue lasers cut efficiently at lower power and with less heat, decreasing your treatment time. The 940 nm wavelength of the EPIC X was developed exclusively for dentistry by BIOLASE, and is better absorbed by hemoglobin and oxyhemoglobin. While all diode lasers cut tissue using heat, many of them can increase tissue temperature excessively, causing patient discomfort.

Increase Comfort

ComfortPulse™ lets you significantly reduce the amount of time the laser is actually cutting, to avoid pain-inducing heat build-up at the surgical site. This unique combination of features means you can perform most soft-tissue procedures using topical anesthetic only.

Increase Precision

With the widest selection of tip length and diameters, plus patented pre-initiated tips, you can select the best tip for your treatment. All tips are bendable, single-use, and disposable for convenient treatment and improved cleanliness.

Procedure	Clinical Images	EPIC X Solution	CDT Codes	Savings/Added Revenue (50% Fees)
Surgical Access of Unerupted Tooth		In-office Procedure Minimally Invasive Access & Field of Vision Minimal Post-op Discomfort	7280	\$482
Gingival Recontouring, Hyperplastic Tissue & Operculectomy		Minimally Invasive Minimal Collateral Tissue Damage Accelerated Treatment Minimal Post-op Discomfort	4210, 4211	\$191-\$500/quad.
Frenectomy		In-office Procedure Topical Anesthetic No Sutures/Laser Bandage™ Minimal Post-op Discomfort	7960	\$355
Aphthous Ulcers & Herpetic Lesions		Immediate Comfort	7465	\$308
Whitening (EPIC Only)		In-office Procedure Accelerated Treatment Time	9972	\$250/arch
Temporary Relief of Minor Pain (such as TMD condition) (EPIC Only)		In-office Procedure for Temporary Relief of Minor Pain	No Definitive Code	\$49-\$500

All of these EPIC diode laser surgical solutions can be provided even more effectively with the all-tissue YSGG WaterLase iPlus 2.0 (except for whitening and temporary pain relief). The CDT code reimbursement fee described above is not a guarantee of payment, these are estimated figures and may vary by state and/or insurance provider. Furthermore, it is the individual and sole responsibility of each health care provider to understand and comply with all state board regulations and any other state or national rules, regulations, or guidelines that govern or may restrict in any way the use of a laser by the clinician who provides care.

Clinical versatility for all your needs.

Unmatched Combination of Power & Portability

- Full 10 watts of power with wireless convenience
- Available battery pack delivers full day of ortho procedures "unplugged"

Unmatched Versatility

- Best control of tissue cutting for different procedures and tissue biotypes

Give Your Patients More Value

- Temporary relief of minor pain
- Exclusive pain therapy handpiece for treatment convenience

Tooth Whitening

- Excellent value-added service for patients
- Only 20 minutes for full mouth whitening

iLase

Powerful, Affordable, Beyond Portable

- Completely self-contained laser handpiece — no foot pedal, cords or external controls
- 5 Watts of peak laser power and up to 3 Watts continuous

Power That Lasts

- Fully charged battery has enough power for longer procedures such as removal of hyperplastic gingiva or several shorter procedures like treatment of an aphthous ulcer

Balanced & Ergonomic

- Exclusive, wraparound finger switch works with light pressure anywhere along its circumference for maximum comfort and efficiency, whether working in anterior or posterior sites
- Pre-programmed settings for the ten most common soft tissue procedures, plus two extras — all fully customizable
